

The smarter cash deposit alternative

Cash deposits are one of the most inefficient uses of capital.

Germany is Europe’s largest rental market—with over 35 billion euros locked in rent deposits in Germany alone. Garentii wants to bring this money back into the real economy

Garentii is an insurtech for real estate making renting easy and accessible for everyone.

With rent deposit insurance from Garentii, renters pay the price of a latte—as little as €3.00—per month instead of €1000s on move-in.

Garentii also provides landlords with industry-leading protection, plus an all-in-one platform to manage all deposits in one place. Landlords save time and money, avoid paperwork and offer a better renting experience.
